The World's Apple

On planet earth all living things depend on the soil: Plants, people, animals...even fish...rely on the soil for food. Only a small portion of our land is capable of producing food.

<p>One</p> <p>Imagine the earth as an apple.</p> 	<p>Two</p> <p>Cut it into 4 equal parts. Only one part is land—the rest is water.</p> 
<p>Three</p> <p>Cut the land section in half. One part is mountains, deserts, or it is covered with ice.</p> 	<p>Four</p> <p>Cut the other livable area into fourths. Three of these are too rocky, wet, hot, infertile, or covered with roads and cities.</p> 
<p>Five</p> <p>There is now only 1/32 of a slice of apple remaining . . .</p> 	<p>Six</p> <p>When this section is peeled it represents the topsoil on which the food is grown that must feed the people on the earth</p>
