Employer and Provider

Cost Share Programs Available to Assist with Rotational Grazing

DSP-3, Planned Grazing Systems, practice is available in participating counties through district cost-share. The main objective is to promote total resource management on pasture land through rotational grazing. Cost share is available for interior fence, water and water distribution.

AgNPS practices and incentives are available for management intensive grazing and related practices for landowners owing ground in the project area.

EQIP, Environmental Quality Incentives Program, is available through NRCS. The programs main objective is to better manage present resources. Cost share will be provided for components necessary to install a grazing system as well as addressing additional on the farm concerns.

MDC, Missouri Department of Conservation, provides cost share for alternative water and fence to exclude livestock from riparian areas.

CCRP, Continuous Conservation Reserve Program, has cost share available for alternative water and fencing for riparian areas for livestock exclusion with enrollment of qualifying ground into CRP as marginal pasture.
